

38mm White NTAG213

One of the most popular NFC labels, the ST703 is a 38mm white label with NXP's NTAG213 chip. A powerful scan performance, high quality manufacturing and reliable construction make this a first choice for applications where space is available.

The large diameter is ideally suited for visual ID print and/or QR code. Common applications include round/healthcare management, point of sale material, brochures and marketing collateral and location tagging.
