

29mm Clear NTAG213

A 29mm round clear sticker with NXP's full featured NTAG213 NFC chip. The 29mm ST710 is a popular all round tag and is often used in product integration. It's slightly thicker and stronger than our other clear tags which gives it an extra durability.

The 29mm size provides a good balance between physical size and ScanStrength performance. This product is also available with a white top face, as a wet inlay (thinner) or a reverse wet inlay (for use behind labels).
