# SERITAG

15mm Wet Inlay NTAG213

A very small 15mm circular wet inlay label with NXP's NTAG213 chip. The wet inlay format means that this tag has a single layer of plastic creating a very thin tag ideal for lamination, label conversion or for hiding behind pre-printed labels. Superb antenna design creates a strong ScanStrength for the size.

This label's small form factor also makes it ideal for product packaging, product integration - such as cosmetics - or other locations where space is limited.
